YORK PUMPING STATION MODEL OF EFFICIENCY

WATER COMPANY PUMP ALONG CODORUS SEEN ONLY FEW CITIZENS

6,000,000 GALLONS A DAY

Since 1894 there has nestled in the valley along the south branch of Codorus creek a handsome red brick structure trimmed in gray sandstone which has housed the mighty machinery that keep the water supply for up to the required quantity. The building and surroundings have been seen by comparatively few people in the city and the great majority for do not know just what work the machinery is used and what is accomplished by the York Water Company to serve its patrons. Since the opening of this pumping station
