

NORMAN ROAD, MANCHESTER TOWNSHIP CUSTOMERS ONLY!

**DO NOT DRINK TAP WATER WITHOUT BOILING!
NO BEBA EL AGUA SIN ANTES HERVIR**

Loss of pressure due to water main break may have allowed contaminants to enter distribution system.

DATE/TIME: 10/29/2024 @ 6:30 pm

UPDATED: 10/30/2024 @ 5:30 pm

We are currently sampling the water to determine if any contaminants are present. Until we've received test results we recommend the following:

Boiling kills bacteria and organisms in the water:

- **Bring water to a boil**
- **Continue boiling for 3-5 minutes**
- **Let water cool before using**

To avoid possible illness: Use boiled or purchased bottled water for drinking, making ice, brushing teeth, washing dishes, and food preparation until further notice.

What could have entered the distribution system? Microbes present in nature can cause short-term effects, such as diarrhea, cramps, nausea, headaches or other systems. They may pose a special health risk for infants, young children, some of the elderly, and people with severely comprised immune systems. **Contact your doctor if you experience any of these symptoms.**

How long will this warning be in effect? We will consult with the State Department of Environmental Protection about this incident. We will notify you with a green door hanger when you no longer need to boil the water.

Please share this information with other residents or users of water on this property!
